

FAITH TUM

Software Developer | +254 716 366 301 | faithtum.cheptoo@gmail.com | [GitHub](#) | [LinkedIn](#) | Faith Tum

PROFESSIONAL SUMMARY

Motivated Software Developer with hands-on experience building end-to-end web applications from database architecture to front-end deployment. Skilled in implementing secure user authentication, interactive UI/UX design, and clean Git workflows. Proficient in Python, Flask, SQLAlchemy, JavaScript, Jinja2, and Tailwind CSS. Passionate about delivering scalable web platforms and integrating AI-driven automation into development workflows.

TECHNICAL SKILL

Languages: Python, JavaScript, SQL, HTML, CSS

Frameworks & Platforms: Flask, Render, Neon DB, Tailwind CSS

Developer Tools: Git, GitHub, GitHub Actions, Docker, DBeaver, Postman, VS Code, Figma/Figjam, Canva

EXPERIENCE

Ongea Tech Mentorship Program | *Software Development Mentee* [\[GitHub\]](#)

Feb 2025 - Present

- Collaborated within a development team to build a full-stack, responsive To-Do List application designed to optimize task management workflows.
- Engineered the application back-end using Python to develop custom server-side routing, request handling, and user authentication systems.
- Designed a relational database using MySQL and Flask-SQLAlchemy, ensuring efficient storage and management of structured user and task data.
- Developed a dynamic front-end user interface using Vanilla JavaScript to handle DOM manipulation and asynchronous communication with back-end RESTful APIs.
- Implemented core CRUD features including dynamic task creation, dead-lining, task prioritization, and basic login/sign-up authentication.

AI/Data Annotator - OneForma

2025 - Present

- Evaluated AI-generated responses against quality and safety guidelines to improve accuracy and relevance of its search systems.
- Reviewed and validated model predictions to identify systemic error patterns and failure modes.

PROJECTS

Caffeine & Chaos (E-Commerce & Cafe) [\[GitHub\]](#)

Tools: Python, Flask, PostgreSQL, Docker

- Engineered an end-to-end retail platform featuring a digital cafe menu, a grower-to-buyer marketplace, and a branded merchandise storefront.
- Built a robust relational database using Flask-SQLAlchemy and PostgreSQL to model dynamic data for users, marketplace products, and cafe inventory items.
- Implemented secure user authentication and access controls to safely manage user sign-ups, secure logins, and distinct buyer/seller storefront privileges.

CERTIFICATIONS

Google/Coursera | Google IT Automation With Python

EDUCATION

Bachelor of Business and IT | Jomo Kenyatta University of Agriculture and Tech

Sept 2018 - July 2024
